

**Insider Trading:** numerous early reports showed a massive trading of “American” put-options and other related airline stocks –just days and weeks before the attack. Why has this not been investigated?

**Airline Safety:** for the first time in history, there was no public investigation of an airline hijacking.

**Victim’s Families:** The department of Justice is attempting to *block disclosure* against the victim’s families who are seeking to use the courts to find out what happened to their loved ones.

**Patriot Act:** a massive bill, with grave implications for civil liberties, was all ready to go when the attacks occurred. Most Congress members didn’t even receive a copy, (much less read it’s hundreds of pages) before it was passed in an atmosphere of chaos and confusion.

**Anthrax:** A year after the outbreaks which killed five people and paralysed a nation, the media, and the *Democratic side of congress*, the FBI claims it still has no hard leads, while numerous experts claim that the FBI is dragging its feet because all the evidence points to *U.S. military laboratories*.

**Air Force Response:** there have been no reprimands or public criticism in relation to the greatest failure of civilian air defence in U.S. history: four hijacked – confirmed planes, over the course of an hour and twenty minutes, and not a single jet fighter in position, as routine procedure demands. The Pentagon claims they “didn’t know” that Flight 77 was “coming our way” when they later admit knowing about the hijackings fifty minutes before it crashed, and have the most sophisticated radar facilities at their disposal.

We don’t claim to have all the answers. We simply see enough of the most basic questions not being addressed – to know that we need a full and open public discussion, before any more innocent lives are lost.

Piercing the smoke and mirrors of propaganda, misinformation and the largest psychological operation ever pulled on humanity, the book calmly and meticulously examines the facts and documents the need for an open, public inquiry into 9/11.

Enormous resources have been squandered to distract, mislead and deflect attention from a deep understanding of the events of 9/11, what actually happened, why it happened, who has benefited and who is paying the price. Outside the U.S., the veil is perhaps easier to see through. Nafeez Mosaddeq Ahmed has the advantage of distance, living in England. He examines the most important...
