Painful Deceptions

This book is used to support the accusation that the US Government was the primary conspirator in the 9-11 attack.

For example, David Ray Griffin references it in his book *The New Pearl Harbor*, and Andreas von Bulow, a retired German government official, references it in his book published in Germany.

Is Hufschmid correct? Was the US government actually involved in the attack? Or is the US government so amazingly **incompetent** that they only appear to be involved?

An incompetent government is as dangerous as a corrupt government, so **we have a serious problem in either case.**

If you decide Osama bin Laden attacked us without our government's assistance, and that the U.S. government is simply incompetent, please find the flaws in this book, put these accusations to rest, and help restore America's credibility.

If you decide that the U.S. government actually was involved in the attack, then this book will help you educate your fellow citizens on the unbelievable corruption in our world.

In either case, this book shows that voters must be **more serious** with the upcoming elections. We must put **respectable government officials** in power.
